

Free for dev - list of software-3 SaaS, PaaS, IaaS, etc. SaaS, PaaS, IaaS, etc.

Keywords

Hits 2543

URL

Developers and Open Source authors now have a massive amount of services offering free tiers, but it can be hard to find them all to make informed decisions.

This is a list of software (SaaS, PaaS, IaaS, etc.) and other offerings that have free tiers for developers.

The scope of this particular list is limited to things that infrastructure developers (System Administrator, DevOps Practitioners, etc.) are likely to find useful. We love all the free services out there, but it would be good to keep it on topic. It's a bit of a grey line at times so this is a bit opinionated; do not be offended if I do not accept your contribution.

This list is the result of Pull Requests, reviews, ideas and work done by 900+ people. You too can help by sending Pull Requests to add more services or by remove ones whose offerings have changed or been retired.

NOTE: This list is only for as-a-Service offerings, not for self-hosted software. For a service to be eligible it has to offer a free tier and not just a free trial. If the free tier is time-bucketed it has to be for at least a year. We also consider the free tier from a security perspective, so SSO is fine but I will not accept services that restrict TLS to paid-only tiers.

Web Hosting

- Alwaysdata — 100 MB free web hosting with support for MySQL, PostgreSQL, CouchDB, MongoDB, PHP, Python, Ruby, Node.js, Elixir, Java, Deno, custom web servers, access via FTP, WebDAV and SSH; mailbox, mailing list and app installer included.
 - Awardspace.com — Free web hosting + a free short domain, PHP, MySQL, App Installer, Email Sending & No Ads.
 - Bubble — Visual programming to build web and mobile apps without code, free with Bubble branding.
 - cloudno.de — Free cloud hosting for Node.js apps.
 - Drive To Web — Host directly to the web from Google Drive & OneDrive. Static sites only. Free forever. One site per Google/Microsoft account.
 - Endless Hosting — 300 MB storage, Free SSL, PHP, MySQL, FTP, free sub-domains, E-Mail, DNS, beautiful panel UI. One of the best!
 - Fenix Web Server - A developer desktop app for hosting sites locally and sharing them publically (in realtime). Work however you like, using its beautiful user interface, API, and/or CLI.
 - Free Hosting — Free Hosting With PHP 5, Perl, CGI, MySQL, FTP, File Manager, POP E-Mail, free sub-domains, free domain hosting, DNS Zone Editor, Web Site Statistics, FREE Online Support and many more features not offered by other free hosts.
-

- Freehostia — FreeHostia offers free hosting services incl. an industry-best Control Panel & a 1-click installation of 50+ free apps. Instant setup. No forced ads.
- heliohost.org — Community powered free hosting for everyone.
- hostman.com — Deploy up to 3 static sites from your GitHub repository for free.
- neocities.org — Static, 1 GB free storage with 200 GB Bandwidth.
- netlify.com — Builds, deploy and hosts static site/app free for, 100 GB data and 100 GB/month bandwidth.
- commons.host - Static web hosting and CDN. 100% free and open source software (FOSS). With a commercially sustainable software as a service (SaaS) to fund R&D.
- pantheon.io — Drupal and WordPress hosting, automated DevOps and scalable infrastructure. Free for developers and agencies
- readthedocs.org — Free documentation hosting with versioning, PDF generation and more
- render.com — A unified platform to build and run all your apps and web app free SSL, a global CDN, private networks and auto deploys from Git, free for static web page.
- sourceforge.net — Find, Create and Publish Open Source software for free
- Stormkit — Integrate building, deploying and hosting seamlessly with your git flow of your JAMStack or Node.js app. 50 GB bandwidth and 10m requests for free per month including free SSL.
- surge.sh — Static web publishing for Front-End developers. Unlimited sites with custom domain support
- tilda.cc — One site, 50 pages, 50 MB storage, only the main pre-defined blocks among 170+ available, no fonts, no favicon and no custom domain
- txti.es — Quickly create web pages with markdown.
- Vercel — Build, deploy, and host web apps with free SSL, global CDN, and unique Preview URLs each time you git push. Perfect for Next.js and other Static Site Generators.
- Versoly — SaaS focussed website builder - unlimited websites, 70+ blocks, 5 templates, custom CSS, favicon, SEO and forms. No custom domain.
- Qovery — Qovery is the simplest way to deploy your full-stack apps on AWS, GCP and Azure. It is free web hosting for developers with Database, SSL, a global CDN, and auto deploys from Git.
- FlashDrive.io - PaaS service similar to Heroku with a developer-centric approach and all inclusive features. Free tier for static assets, staging and developer apps.

DNS

- 1984.is — Free DNS service with API, and lots of other free DNS features included.
 - biz.mail.ru — Free email and DNS hosting for up to 5,000 users
 - cloudns.net — Free DNS hosting up to 1 domain with 50 records
 - dns.he.net — Free DNS hosting service with Dynamic DNS Support
 - dnspod.com — Free DNS hosting.
 - duckdns.org — Free DDNS with up to 5 domains on the free tier. With configuration guides for various setups.
 - dynu.com — Free dynamic DNS service
 - fosshost.org - Free open source hosting VPS, web, storage and mirror hosting
 - freedns.afraid.org — Free DNS hosting. Also provide free subdomain based on numerous public user contributed domains. Get free subdomains from "Subdomains" menu after signing up.
 - luadns.com — Free DNS hosting, 3 domains, all features with reasonable limits
 - namecheap.com — Free DNS. No limit on number of domains
 - nextdns.io - DNS based firewall, 300K free queries monthly
-

- [noip](#) — a dynamic dns service that allows up to 3 hostnames free with confirmation every 30 days
- [ns1.com](#) — Data Driven DNS, automatic traffic management, 500k free queries
- [pointhq.com](#) — Free DNS hosting on Heroku.
- [selectel.com](#) — Free DNS hosting, anycast
- [web.gratisdns.dk](#) — Free DNS hosting.
- [Yandex.Connect](#) — Free email and DNS hosting for up to 1,000 users
- [zalore.com](#) — Free DNS hosting.
- [zoneedit.com](#) — Free DNS hosting with Dynamic DNS Support.
- [zonewatcher.com](#) — Automatic backups and DNS change monitoring. 1 domain free
- [huaweicloud.com](#) - Free DNS hosting by Huawei
- [Hetzner](#) - Free DNS hosting from Hetzner with API support
- [Glauc](#) - Free DNS hosting for up to 3 domains and DNSSEC support
- [F5](#) - Free Anycast DNS hosting for primary zones. And free for secondary zones up to 1 domain and 3 million requests per month.

IaaS

- [backblaze.com](#) — Backblaze B2 cloud storage. Free 10 GB (Amazon S3-like) object storage for unlimited time
- [scaleway.com](#) — S3-Compatible Object Storage. Free 75 GB storage and external outgoing traffic
- [terraform.io](#) — Terraform Cloud. Free remote state management and team collaboration for teams up to 5 users.

DBaaS

- [airtable.com](#) — Looks like a spreadsheet, but it's a relational database, unlimited bases, 1,200 rows/base and 1,000 API requests/month
 - [Astra](#) — Cloud Native Cassandra as a Service with 40GB free tier
 - [cloudamqp.com](#) — RabbitMQ as a Service, up to 1M messages/month and 20 connections free
 - [elephantsql.com](#) — PostgreSQL as a service, 20 MB free
 - [FaunaDB](#) — Serverless cloud database, with native GraphQL, multi-model access and daily free tiers up to 100 MB
 - [HarperDb](#) — Serverless cloud database, with dynamic schema based on JSON, 3000 IOPS with 1GB storage
 - [graphenedb.com](#) — Neo4j as a service, up to 1,000 nodes and 10,000 relations free
 - [heroku.com](#) — PostgreSQL as a service, up to 10,000 rows and 20 connections free (provided as an "addon," but can be attached to an otherwise empty app and accessed externally)
 - [Upstash](#) — Serverless Redis with free tier up to 10,000 requests per day, 256MB max database size, and 20 concurrent connections
 - [MongoDB Atlas](#) — free tier gives 512 MB
 - [redsmn.com](#) — Online real-time monitoring and administration service for Redis, Monitoring for 1 Redis instance free
 - [redislabs](#) - Free 30Mb redis instance
 - [MemCachier](#) — Managed Memcache service. Free for up to 25MB, 1 Proxy Server and basic analytics
 - [scalingo.com](#) — Primarily a PaaS but offers a 128MB to 192MB free tier of MySQL, PostgreSQL or MongoDB
 - [SeaTable](#) — Flexible, Spreadsheet-like Database built by Seafile team. unlimited tables, 2,000 lines, 1-month versioning, up to 25 team members.
 - [skyvia.com](#) — Cloud Data Platform, offers free tier and all plans are completely free while in beta
-

- StackBy — One tool that brings together flexibility of spreadsheets, power of databases and built-in integrations with your favorite business apps. Free plan includes unlimited users, 10 stacks, 2GB attachment per stack.
- InfluxDB — Timeseries database, free up to 3MB/5 minutes writes, 30MB/5 minutes reads and 10,000 cardinalities series
- Quickmetrics — Timeseries database with dashboard included, free up to 10,000 events/day and total of 5 metrics.
- restdb.io - a fast and simple NoSQL cloud database service. With restdb.io you get schema, relations, automatic REST API (with MongoDB-like queries) and an efficient multi-user admin UI for working with data. Free plan allows 3 users, 2500 records and 1 API requests per second.
- cockroachlabs.com — Free CockroachDB up to 5GB and 1vCPU.

STUN, WebRTC, Web Socket Servers and Other Routers

- conveyor.cloud — Visual Studio extension to expose IIS Express to the local network or over a tunnel to a public URL.
- Hamachi — LogMeIn Hamachi is a hosted VPN service that lets you securely extend LAN-like networks to distributed teams with free plan allows unlimited networks with up to 5 peoples
- Radmin VPN - Connect multiple computers together via a VPN enabling LAN-like networks. Unlimited peers. (Hamachi alternative)
- localhost.run — Instantly share your localhost environment! No download required. Run your app on port 8080 and then run this command and share the URL.
- ngrok.com — Expose locally running servers over a tunnel to a public URL.
- segment.com — Hub to translate and route events to other third-party services. 100,000 events/month free
- stun:global.stun.twilio.com:3478?transport=udp — Twilio STUN
- stun:stun.l.google.com:19302 — Google STUN
- webhookrelay.com — Manage, debug, fan-out and proxy all your webhooks to public or internal (ie: localhost) destinations. Also, expose servers running in a private network over a tunnel by getting a public HTTP endpoint (https://yoursubdomain.webrelay.io <----> http://localhost:8080).
- Xirsys — Global network of STUN / TURN servers with a generous free tier.
- ZeroTier — FOSS managed virtual Ethernet as a service. Unlimited end-to-end encrypted networks of 100 clients on free plan. Clients for desktop/mobile/NA; web interface for configuration of custom routing rules and approval of new client nodes on private networks.

Issue Tracking and Project Management

- acunote.com — Free project management and SCRUM software for up to 5 team members
 - AppFlux — Project Management tool with Log Management & Issues. Take your team onboard & forget management through emails.
 - asana.com — Free for private project with collaborators
 - Backlog — Everything your team needs to release great projects in one platform. Free plan offers 1 Project with 10 users & 100MB storage.
 - Basecamp - To-do lists, milestone management, forum-like messaging, file sharing, and time tracking. Up to 3 projects, 20 users, and 1GB of storage space.
 - bitrix24.com — Free intranet and project management tool
 - cacoo.com — Online diagrams in real-time: flowchart, UML, network. Free max. 15 users/diagram, 25 sheets
-

-
- [clickup.com](#) — Project management. Free, premium version with cloud storage. Mobile applications and Git integrations available
 - [Cloudcraft](#) — Design a professional architecture diagram in minutes with the Cloudcraft visual designer, optimized for AWS with smart components that show live data too.
 - [Clubhouse](#) - Project management platform. Free for up to 10 users forever
 - [Codegiant](#) — Project Management with Repository hosting & CI/CD. Free Plan Offers Unlimited Repositories, Projects & Documents with 5 Team Members. 500 CI/CD minutes per month. 30000 Serverless Code Run minutes per month. 1GB repository storage.
 - [Confluence](#) - Atlassian's content collaboration tool used to help teams collaborate and share knowledge efficiently. Free plan up to 10 users.
 - [contriher.com](#) — Customizable project management platform, free starter plan, 5 workspaces
 - [draw.io](#) — Online diagrams stored locally, in Google Drive, OneDrive or Dropbox. Free for all features and storage levels
 - [freedcamp.com](#) - tasks, discussions, milestones, time tracking, calendar, files and password manager. Free plan with unlimited projects, users and files storage.
 - [easyretro.io](#) — Free simple and intuitive sprint retrospective tool
 - [GForge](#) — Project Management & Issue Tracking toolset for complex projects with self-premises and SaaS options. SaaS free plan offers first 5 users free & free for Open Source Projects.
 - [gleek.io](#) — Free description-to-diagrams tool for developers. Create informal, UML class, object, or entity-relationship diagrams using your keyword.
 - [gliffy.com](#) — Online diagrams: flowchart, UML, wireframe,... Also plugins for Jira and Confluence. 5 diagrams and 2 MB free
 - [GraphQL Inspector](#) - GraphQL Inspector outputs a list of changes between two GraphQL schemas. Every change is precisely explained and marked as breaking, non-breaking or dangerous.
 - [huboard.com](#) — Instant project management for your GitHub issues, free for Open Source
 - [Instabug](#) — A comprehensive bug reporting and in-app feedback SDK for mobile apps. Free plan up to 1 app and 1 member.
 - [Ilograph](#) — interactive diagrams that allow users to see their infrastructure from multiple perspectives and levels of detail. Diagrams can be expressed in code. Free tier has unlimited private diagrams with up to 3 viewers.
 - [Issue Embed](#) - A bug reporting tool for websites to go directly into your Github Issues. Free plan for personal repositories with up to 500 issues/month and 10,000 page views/month.
 - [Jira](#) — Advanced software development project management tool used in many corporate environments. Free plan up to 10 users.
 - [kanbanflow.com](#) — Board-based project management. Free, premium version with more options
 - [kanbantool.com](#) — Kanban board-based project management. Free, paid plans with more options
 - [Kitemaker.co](#) - Collaborate through all phases of the product development process and keep track of work across Slack, Discord, Figma, and Github. Unlimited users, unlimited spaces. Free plan up to 250 work items.
 - [kanrails.com](#) — Kanban board-based project management. Free for 3 collaborators, 2 projects and 5 tracks. Paid plans available for unlimited collaborators, projects and tracks.
 - [Kumu.io](#) — Relationship maps with animation, decorations, filters, clustering, spreadsheet imports and more. Free tier allows unlimited public projects. Graph size unlimited. Free private projects for students. Sandbox mode is available if you prefer to not leave your file publicly online (upload, edit, download, discard).
 - [LeanBoard](#) — Collaborative whiteboard with sticky notes for your GitHub issues (Useful for Example Mapping and other techniques)
 - [Linear](#) — Issue tracker with streamlined interface. Free for unlimited members, up to 10MB file upload size, 250 issues (excluding Archive)
-

- MeisterTask — Online task management for teams. Free up to 3 projects, unlimited project members.
 - MeuScrum - Free online scrum tool with kanban board
 - nTask — Project management software that enables your teams to collaborate, plan, analyze and manage everyday tasks. Basic Plan free forever with 100 MB storage, 5 users/team. Unlimited workspaces, meetings, tasks, timesheets and issue tracking.
 - Ora - Agile task management & team collaboration. Free for up to 3 users and files are limited to 10 MB.
 - pivotaltracker.com — Free for unlimited public projects and two private projects with 3 total active users (read-write) and unlimited passive users (read-only).
 - plan.io — Project Management with Repository Hosting and more options. Free for 2 users with 10 customers and 500MB Storage
 - planitpoker.com — Free online planning poker (estimation tool)
 - saas.zentao.pm - An Application Lifecycle Management solution for Issue Tracking and Project Management, on-premise and open source version are available as well.
 - ScrumFast - Scrum board with a very intuitive interface, free up to 5 users.
 - SpeedBoard - Board for Agile and Scrum retrospectives - Free.
 - Shake - In-app bug reporting and feedback tool for mobile apps. Free plan, 10 bug reports per app/per month.
 - Tadam - Meeting agenda and minutes app designed for recurring meetings, free for teams up to 10
 - taiga.io — Project management platform for startups and agile developers, free for Open Source
 - Tara AI — Simple sprint management service. Free plan has unlimited tasks, sprints and workspaces, with no user limits.
 - targetprocess.com — Visual project management, from Kanban and Scrum to almost any operational process. Free for unlimited users, up to 1,000 data entities {more details}
 - taskade.com — Real-time collaborative task lists and outlines for teams
 - taskulu.com — Role based project management. Free up to 5 users. Integration with GitHub/Trello/Dropbox/Google Drive
 - teamwork.com — Project management & Team Chat. Free for 5 users and 2 projects. Premium plans available.
 - testlio.com — Issue tracking, test management and beta testing platform. Free for private use
 - terrastruct.com — Online diagram maker specifically for software architecture. Free tier up to 4 layers per diagram.
 - todoist.com — Collaborative and individual task management. Free, Premium and Team plans are available. Discounts provided for eligible users.
 - trello.com — Board-based project management. Unlimited Personal Boards, 10 Team Boards.
 - Tweek — Simple Weekly To-Do Calendar & Task Management.
 - ubertesters.com — Test platform, integration and crowdtesters, 2 projects, 5 members
 - vabotu - A collaborative tool for project management. Free and other plans are available. The Freelance plan is for 10 users, include messaging, task-boards, 5GB online storage, workspaces, export data.
 - vivifyscrum.com — Free tool for Agile project management. Scrum Compatible
 - Wikifactory — Product designing Service with Projects, VCS & Issues. Free plan offers unlimited projects & collaborators and 3GB storage.
 - Yodiz — Agile development and issue tracking. Free up to 3 users, unlimited projects.
 - YouTrack — Free hosted YouTrack (InCloud) for FOSS projects, private projects (free for 3 users). Includes time tracking and agile boards
 - zenhub.com — The only project management solution inside GitHub. Free for public repos, OSS and nonprofit organizations
 - zepel.io - The project management tool that lets you plan features, collaborate across disciplines, and build software together. Free up to 5 members. No feature restrictions.
-

-
- [zenkit.com](#) — Project management and collaboration tool. Free for up to 5 members, 5 GB attachments.
 - [Zube](#) — Project management with free plan for 4 Projects & 4 users. GitHub integration available.

Storage and Media Processing

- [borgbase.com](#) — Simple and secure offsite backup hosting for Borg Backup. 10 GB free backup space and 2 repositories.
 - [sirv.com](#) — Smart Image CDN with on-the-fly image optimization and resizing. Free tier includes 500 MB of storage and 2 GB bandwidth.
 - [image4.io](#) — Image upload, powerful manipulations, storage and delivery for websites and apps, with SDK's, integrations and migration tools. Free tier includes 25 credits. 1 credit is equal to 1 GB of CDN usage, 1GB of storage or 1000 image transformations.
 - [cloudimage.com](#) — Full image optimization and CDN service with 1500+ Points of Presence around the world. A variety of image resizing, compression, watermarking functions. Open source plugins for responsive images, 360 image making and image editing. Free monthly plan with 25GB of CDN traffic and 25GB of cache storage and unlimited transformations.
 - [cloudinary.com](#) — Image upload, powerful manipulations, storage and delivery for sites and apps, with libraries for Ruby, Python, Java, PHP, Objective-C and more. Free tier includes 25 monthly credits. 1 credit is equal to 1,000 image transformations, 1 GB of storage, or 1 GB of CDN usage.
 - [easyDB.io](#) — one-click, hosted database provider. They provide a database for the programming language of your choice for development purposes. The DB is ephemeral and will be deleted after 24 or 72 hours on the free tier.
