Leading the industry through quality and innovation

Solarsense is considered one of the UK's leading renewable energy contractors.

### About Solarsense

Solarsense is one of the UK's most established solar panel and clean energy technology installers. We have seen the renewable energy industry develop and are proud of our role in driving forward the uptake of clean energy systems in the South West and UK as a whole.

Since being founded in 1995, Solarsense has completed more than 14,000 residential, commercial and industrial renewable energy installations and is responsible for powering some of the UK's leading organisations. From the National Composites Centre and Renishaw to the RSPB and the Duchy of Cornwall, Solarsense has earned a reputation for trusted advice and high-quality installations.

We place great emphasis on the quality of our installations and have won 19 regional and national awards in recognition of our expertise, customer service, and pioneering energy projects.

### HOW WE WORK

Guiding you through the process to create the best possible outcome

- Our energy experts use industry leading software to configure your system and provide accurate generation figures as well as financial predictions.
- Our award-winning installations have resulted in excellent customer feedback and more than 19 industry awards including UK Contractor of the Year and Best Project.
- Our relationship with you doesn't end after installation, we offer a comprehensive O&M service to ensure your system continues to perform for the duration of its lifetime.

### Our Approach

An award-winning approach to renewable energy

---

- **Unparalleled experience & expertise**

We utilise our unparalleled 24 years within the industry to work with our clients and audit their current situation to identify the best suited technologies for their specific needs.

- **Specialise across sectors**

From homes and churches to schools and factories, we are renewable energy experts, capable of designing a bespoke energy system that delivers results.

- **First class delivery, after care & support**

We work with our clients every step of the way, including; MCS registrations, planning permissions, finance advice, DNO, G59, and grant applications - right through to the hand over of your system.

- **Highly recommended by our customers**

We pride ourselves on building strong, long lasting relationships - proven by our high rate of repeat custom and impressive customer feedback.

- **Giving back**

Each year we invest our time and expertise in direct support of selected charitable projects throughout the UK and beyond.

- **Free, no obligation survey**

We offer expert advice rather than hard sell and offer our clients a free desktop survey with absolutely no obligation to buy.

## **Award winning installations**

- 

### **INDUSTRY ACCREDITED**

- 

### **Our Zero Carbon Office and Training Centre**

Helios House

#### **Zero Carbon Office**

Helios House plays a part in the overall aim to transform the Solarsense head office into a regional centre of excellence for renewable energy, sustainability and biodiversity. The state of the art building was designed to generate more energy than it consumes and boasts an extensive array of fully integrated photovoltaic panels, solar PV roof lights, LED lighting, phase change hot water store, load diversion switch, ground source heat pump & electric vehicle charge-points.

---

- **GENERATING OVER**

**12,000kWh of clean energy per year**

- **OFFSETTING APPROX**

**8 tonnes of carbon emissions per annum**

## **CORPORATE SOCIAL RESPONSIBILITY**

Sharing our knowledge and expertise

We take our social responsibility seriously and feel it is only right that organisations do what they can to share their knowledge. Each year we invest our time and expertise in direct support of selected charitable projects throughout the UK and beyond. You can read more about a few of our charity projects below. If you would like to get involved in our work or find out more about a specific project please contact us.
