### Our Philosophy

Sound was built with a simple philosophy: to bring a novel and always-evolving experience to nightlife in Hollywood. We worked with a dream team of designers, professionals, and industry specialists to create an environment based in cutting-edge visual and audio technology, musical formats, and interior design. Our interior 3D mapping and custom video content, paired with our one-of-a-kind sound system, offer an unparalleled nightclub journey.

### Venue

Sound's layout provides an ideal venue for private and corporate events of all types and sizes. Sound is located in the heart of Hollywood, within walking distance from most major theaters, making it an ideal place for premiere and after-parties. Our talented, in-house event production team can create a unique environment just for your party, from décor, to florals, to table-scapes, to gobos, and more. We guarantee you a successful and memorable event when you book it at Sound.

Blending modern décor with raw, industrial touches, Sound presents modern creative concepts, such as an expansive sunken dance floor, elevated DJ booth, spacious private tables with unparalleled sightlines to the stage, and cutting edge audiovisual and lighting designs throughout.

Highlighted features of Sound's 8,000 square foot space include: multiple full-service bars, gourmet kitchen for onsite catering, oversized booths and recessed seating, changeable silk display panels on the club's facade, and a first-of-its-kind Pioneer sound system. Projection screens with state-of-the-art 3D projection mapping are also strategically placed throughout the club, and can display custom branding or video reels. Refurbished wood paneling from Frank Sinatra's previous home and stairway railings salvaged from a Colorado railroad track are just the start of the unique and detailed interior of this beautiful venue.
